Profile

Full Stack Developer with 3+ years of experience building scalable, performant applications. Proven record of delivering production-ready platforms for startups and freelance clients.

Skills

- Programming Languages: *JavaScript, TypeScript, SQL, Python, PHP, Java, Go.*
- Frameworks & Libraries: React / Nextjs, Laravel, Symphony, Express.js, Cypress, Codeception, Appium.
- Databases: MySQL, PostgreSQL, MongoDB.
- Tools & Environments: Git, GitHub, VS Code, Postman, Vercel, npm, Linux shell, Jira.
- Concepts: Software Development Life Cycle, Agile, MVC, Responsive Design.

Work Experience

Software Engineer – Maviance (Intern) | Oct. 2025 – Ongoing

- **QA & Automated Testing:** Executed comprehensive functional, regression, and integration testing while implementing automated testing via **Cypress/Codeception** and tracking defects in **JIRA**.
- **Backend Development:** Built and optimized backend architectures and third-party API connectors using **PHP and Go**.
- **Frontend Development:** Developed responsive, seamless user interfaces for web and mobile applications using **React and React Native**.
- **System Stability & Documentation:** Ensured system stability by writing unit tests, debugging full-stack performance issues, and documenting APIs and UI components.

Full Stack Developer & Product Designer | Esmartlearning (Freelance)

- **Agile Project Management:** Project planning, budget estimation, and sprint coordination utilizing Agile methodologies to ensure on-time feature delivery.

- **Full-Stack Engineering & UI/UX:** Designed intuitive, user-centric wireframes in Figma and engineered a robust skills-assessment platform using a Laravel REST API and a React.js frontend built with Material UI.
- **Deployment & Operations:** Managed the end-to-end deployment and continuous maintenance on Vercel, ensuring high availability and seamless platform updates.

Network & IT Support Engineer | Online Africa (Contract) (*Jan. 2024 – Oct. 2025*)

- **Infrastructure Maintenance:** Proactively monitored and maintained enterprise IT systems and network infrastructure to optimize performance and achieve minimal operational downtime. Provided rapid-response technical troubleshooting for hardware, software, and complex network disruptions, minimizing business friction.
- **Technical Documentation:** Authored comprehensive incident logs, root-cause analysis reports, and performance documentation

Front-End Developer | Interstation Connect (Freelance) (*Aug 2024 – Dec. 2024*)

- **UI Implementation:** Developed and implemented a React.js UI from mockup designs using Material UI.
- **Deployment & Maintenance:** Deployed and maintained the application on Vercel.

Personal Projects

Task Management Platform: A productivity-oriented task management application with a RESTful API, featuring task statuses, due dates, and multi-project support.

Event Management Platform: An event management and discovery platform offering features such as user registration, event reminders, and participant management.

Services Booking System: A booking application for services like salons and consultations, with customizable services, time slots, and reminders. See portfolio for project links

Education & Certifications

Bachelor of Engineering in Computer Science and Engineering

Institut Universitaire de la Côte (Douala) | 2020 – 2024

IBM Full Stack Software Engineering - IBM via Coursera

Microsoft Excel - Microsoft Excel Associate Certification

Languages

English - French
